

## CLAIM

I, Michael Washington claim that I am the first to invent the **"Card Collectors Backpack"**. The Card Collectors Backpack is a unique and original combined backpack/trading card holder.

The Card Collectors Backpack is made from jean cloth, waterproof material. A hard back loose leaf binder is attached inside of the backpack made up of individual card protectors for storing the trading cards. The card protectors are designed to protect the cards from getting damaged. Straps and a handle are added to make easy carrying. Many of the Card Collectors Backpacks come with front pockets to store an autograph book and two (2) pens and or pencils. The Card Collectors Backpack varies in designs, materials, sizes and color.
